

**Cryptoecosystems
with new generation core**

Qchain is a full-fledged blockchain platform able to operate privately and publicly for the state, commercial, and private activities.

This platform can be used with both regular consumer computers and more powerful processors, base stations, as well as the latest electronic and computer technology.

Several modules and smart contracts have been developed to date; the platform is undergoing full-scale testing, and the following results have been achieved:

100 000

Transactions per second –
Actual transaction speed achieved to date*

* – based on Testnet results

1 000 000

Transactions per second –
Estimated network speed

All the blockchain opportunities are open for you

- Interlegder protocol for using wrapped BTC and ETH, including DeFi smart contracts on the independent chain
- Fast transactions with lowest fees
- Proof of Stake (PoS)
- Readiness for high load tasks
- Quantum cryptographic protection

QDT functions

- Access to the ecosystem
- Discounts within ecosystems

QDT characteristics

- Life cycle of the pump/dump protection
- Increasing demand from the company's community
- Participation in PoS staking

QDT on cryptocurrency exchanges

Hotbit since 2021

BitMart since 2022

New exchanges are coming soon!

Private ecosystem in one place

QDEX decentralized exchange

Allows exchanging cryptocurrencies, QDT, Bitcoin, Ethereum, Litecoin, and Dogecoin on the platform for a token sale.

- ✓ **Fast payments:** Function of an instant exchange
- ✓ **Protection:** Decentralized contracts, all the Money remain with you
- ✓ **Reliability:** Backup and DDOS protection

Data storage

- ✓ Using smart contracts
- ✓ Absolute decentralization
- ✓ Application in all fields of activity
- ✓ The storage fee is paid only for the volume actually used.
- ✓ File sharing into 7 parts
- ✓ Download speed is faster than any P2P
- ✓ Instant access speed
- ✓ Lifetime storage

QCHAIN

Secret chats

- ✔ Personal encryption
- ✔ Private keys
- ✔ Transactions with cryptocurrency in chats
- ✔ Technologies of local information placement
- ✔ Transactions between the members without fees
- ✔ 40+ security settings

Smart constructor for startup creation

Instant and independent creation of a
customized token for the ICO without the
involvement of third parties

For new startups

PITCHCAMP
ACCELERATOR

Services on our blockchain

Megamind.cloud, a distributed computing network with numerous digital services for the following:

- R&D
- Internet of Things and smart cities
- Robots and self-driving vehicles.
- Trader bots
- Digital economy

QCHAIN

 @QCHAINpublic

 QCHAIN official channel

 u/qchaindev

The latest Qchain news, updates, and notifications will be featured in the channels.

Suggest systems to spread the word about Qchain

Rewards for the users in the Qchain network

1. HODL

Hold > 100,000 QDTs and get profit from 50% of all the QCHAIN network transactions

2. Burning

Quarterly burning of the liquidity from profit per 100 rounds and 1 bln tokens

3. Wrapped tokens

Launch of the decentralized USD and getting % of the profit from the wrapped tokens

4. Storage

Sales profits from the decentralized storage in the amount of 30% of the payment amount

6. Network growth

Gradual increase in the number of products, growth of the community, and demand

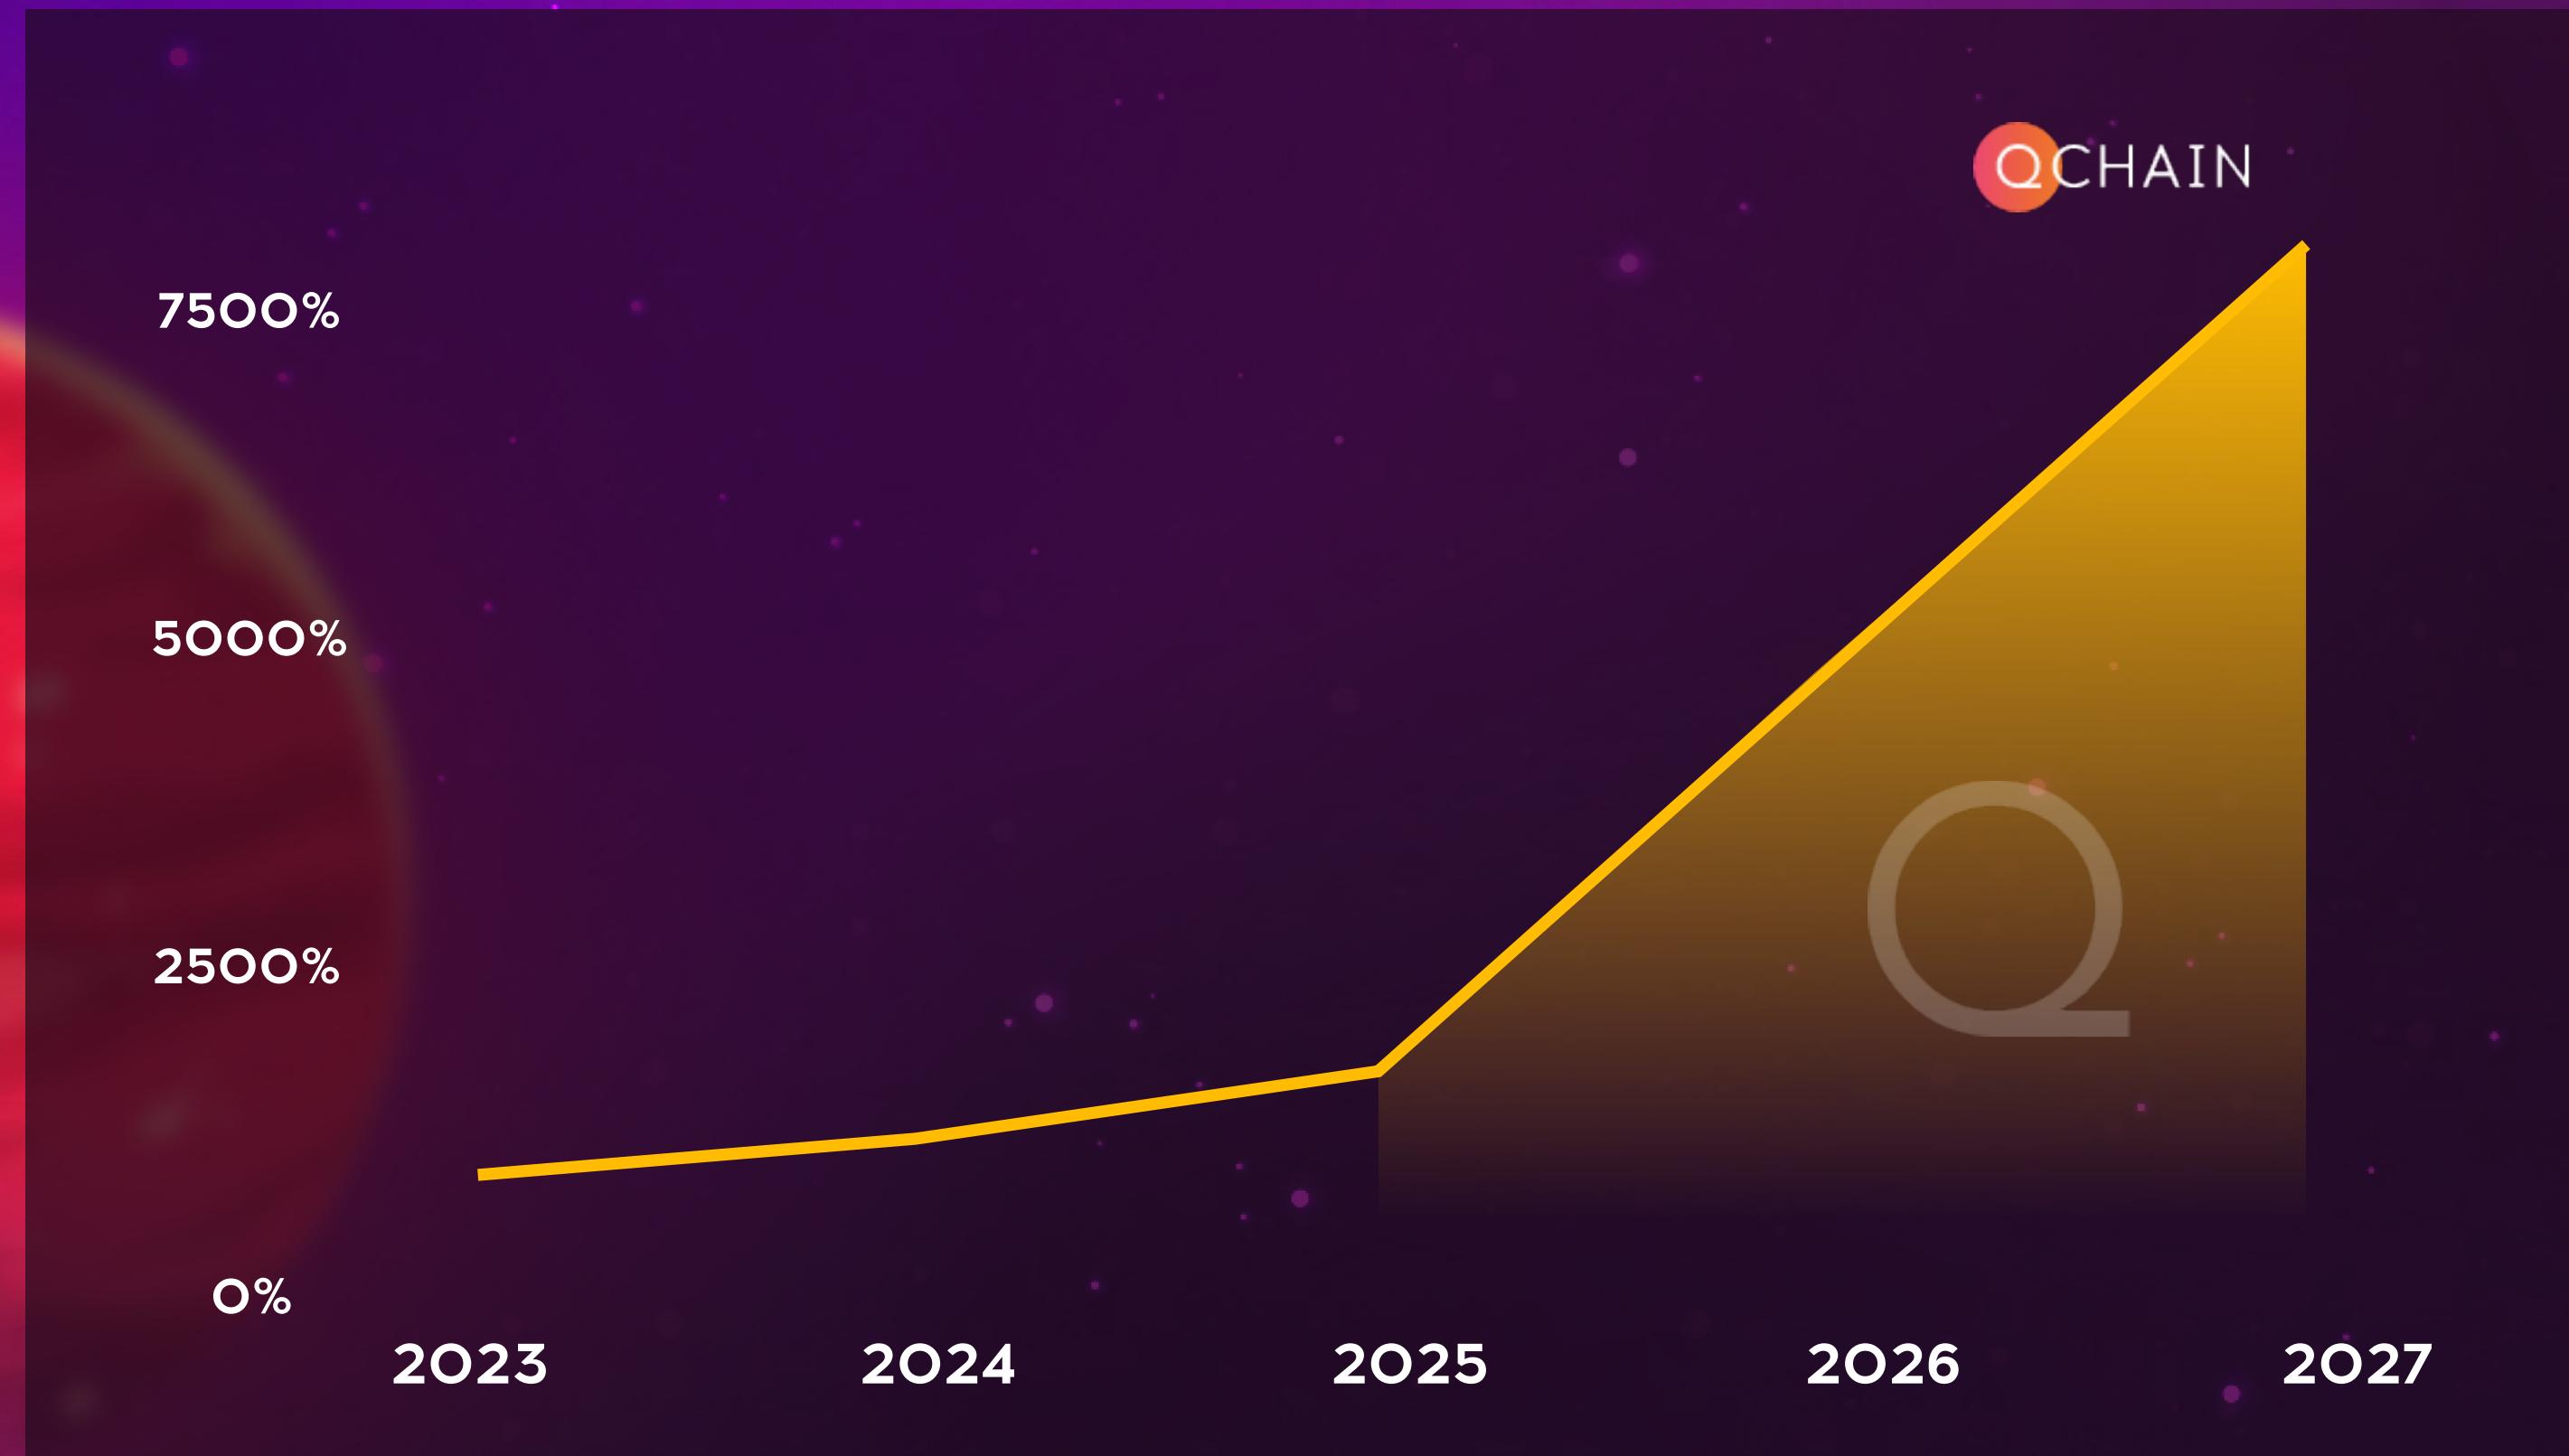

5. Speed

Network scaling and speed > 1,000,000 transactions per second

QDT/QSTN

Increasing demand and the network growth

Year	Income per 100,000 QDTs in USDT	Income per 100,000 QDTs in %
2023	0,05	250%
2024	0,35	1750%
2025	0,7	3500%
2026	1,0	5000%
2027	1,15	5750%

POLLY

buys 120,000 QDTs for \$2,400 and earns \$138,000 by 2025

DRIVERS OF GROWTH YIELD:

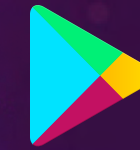

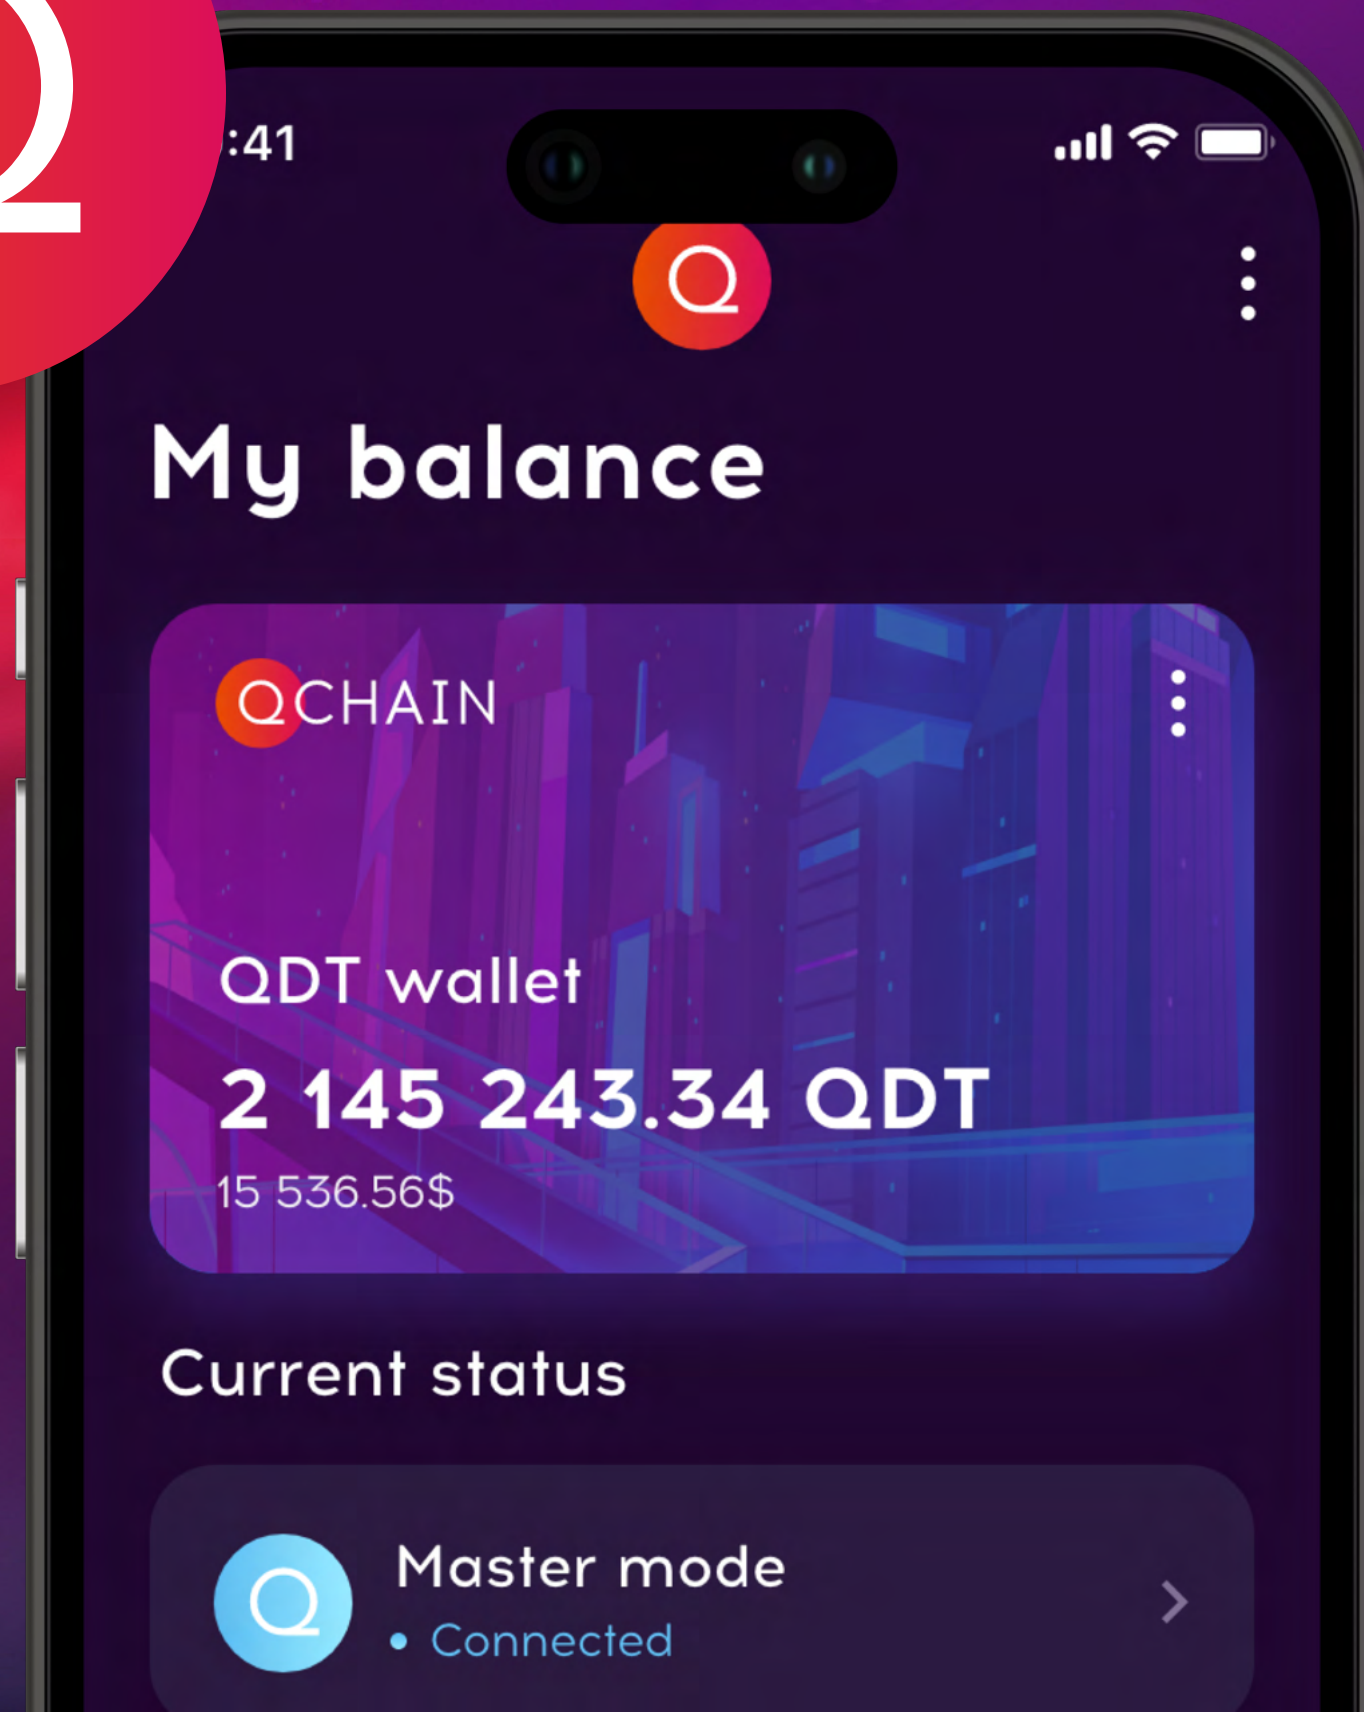

1. Token appreciation
2. Fee income in QDT for a privileged node holder (Qchain Staking)
3. Income from the sale of decentralized storage
4. Regular income from new products emerging within Qchain

Node functions

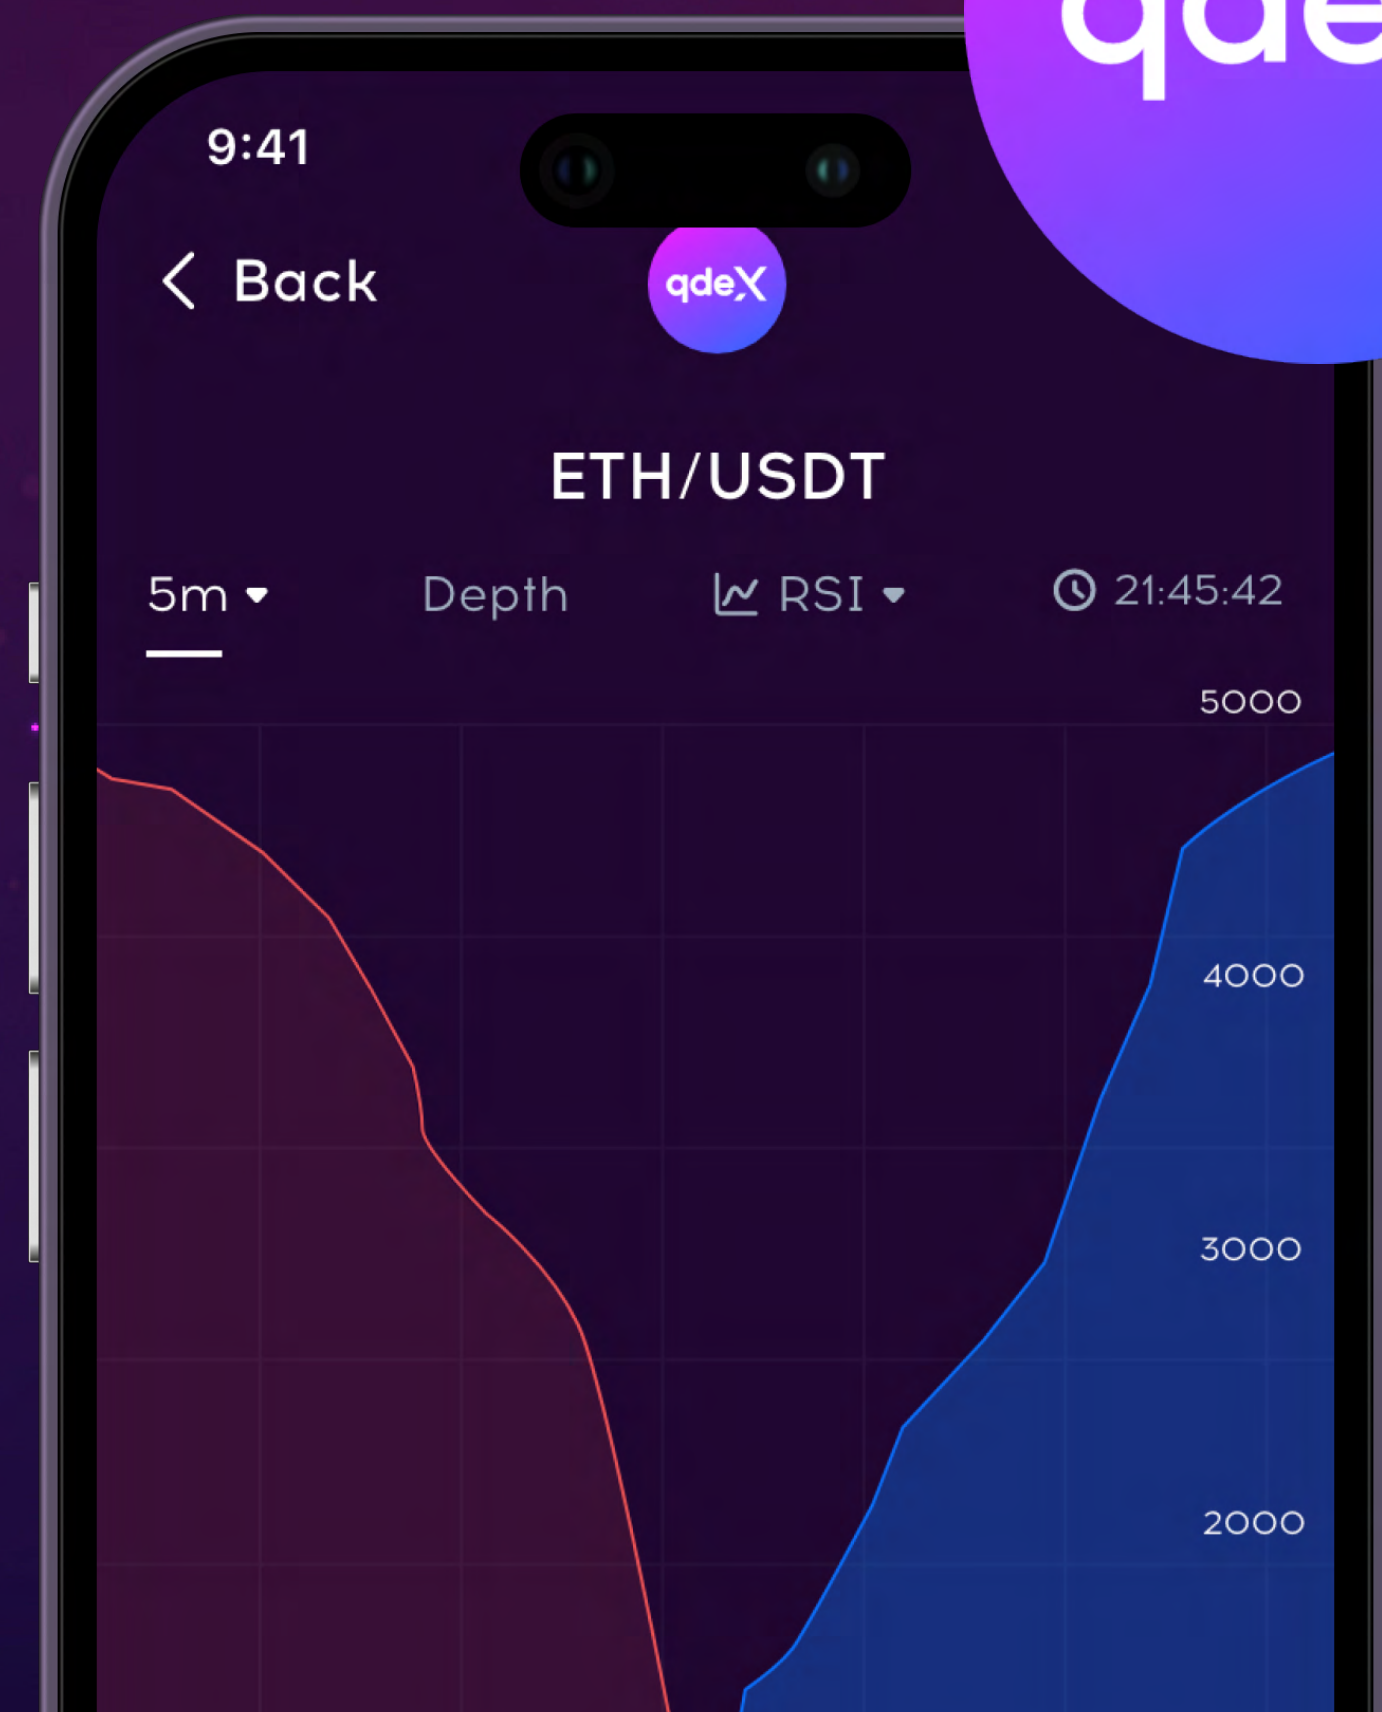

The Qchain node is the gateway to the Qchain ecosystem. The user installs the node on their device (iOS, Android, Windows, MacOS) and discovers the ecosystem capabilities in one app.

QNODE

QDEX

And 10+ other great features

QDEX decentralized exchange

QDEX is a decentralized platform built on the Qchain blockchain.

The Qchain node has a special QDEX tab. Users get instant access to the DEX features when they click on it.

- ✓ Trade without intermediaries.
- ✓ Your keys are your funds
- ✓ Complete asset security
- ✓ Instant exchanges
- ✓ Anonymous cryptocurrency conversion

Magic Lotto is a decentralized lottery running on the Qchain blockchain, where smart contracts execute all the processes.

Winning

Decentralized algorithm for generating winnings

Automation

Automation of all draws, deposit, and withdrawal of funds

Participation

One can participate in the draw from anywhere in the world

Magic Lotto

Quarter 1, 2023

QChain DEV

- QChain Node
 - Blockchain: Non-Active Account Freezing
 - Documentation: Creating a QChain Wiki
- QChain Node dApps
 - QStaking: Time Locking
 - QNFT: Creating of the NFT
 - QDEX: Creating a second counter
 - QSTN: Creating a QTreasury client

● QChainDot

- Team building
- Creating a concept of a EVM supporting substrate-based side-chain
- MVP

● QChainSpace

- QTreasury: Based (USDT-ERC20, USDT-TRC-20)
- QChainPlace: Concept
- QFight: Concept, Tokensale
- Tirus: Rebranding
- MagicLotto

QMarketing

- Developer meetups & Connections
- Listings: DigiFinex
- Ambassador Program
- GameFI Partnerships
- QChain Hackathon 2023
- Youtube & Telegram AMA

QBase

- Activating the offer to freeze tokens for the accounts that have remained inactive for 24 months

Quarter 2, 2023

QChain DEV

- QChain Node
 - QChain Virtual Machine: Smart-Contract Concept, Smart-Contract Language
- QChain Node dApps
 - QDEX
 - QChat
 - QStaking
 - QSupport

● QChainDot

- Dev-Net
- QChainSpace
 - QBridge: (QBTC, QETH, QLTC)
 - QTProperties (QChain Tokenized Properties)

- QDAO: Concept

- QChain Fighting Championship: Concept, Tokensale
- MagicLotto: Public Sale

QMarketing

- Developer meetups & Connections
- Blockchain Conferences
- Blockchain Community meetups
- QChain Hackathon 2023 FInal
- Youtube & Telegram AMA

Quarter 3, 2023

QChain DEV

- QChain Node
 - QChain Node dApps
 - QDEX
 - QStaking
 - QStorage
 - QChainDot
 - QChain Node Integration
 - Test-Net

● QChainSpace

- QChain Fighting Championship: Game MVP
- QDAO: Yield Staking / Farming, Release
- MagicLotto: Public Sale END

QMarketing

- Blockchain Conferences
- GameFi Partnerships

Quarter 4, 2023

QChain DEV

- QChain Node
 - QChain Node dApps
 - QChainDot
 - GitHub
 - PolkaStarter
 - Main-Net
 - Integration: Bridge Between chains
 - Security audit

● QChainSpace

- QDAO Bridges
- QChain Fighting Championship: Game Release
- MagicLotto

QMarketing

- Blockchain Conferences
- Blockchain Community meetups
- QChain Dot Hackathon

QCHAIN Roadmap 2023

Entry into the Asian market

- Scheduled events and meetings
- Agreements and partnerships
- Connecting new projects

New product in the Qchain ecosystem

Qchat

5,000,000,000+ people in the world use instant messengers in their day-to-day operation.

No messenger can guarantee 100% protection against hacking and information leaks nowadays.

Qchat can solve this.

- ✓ Advanced functions
- ✓ Calls and messaging
- ✓ Token integration
- ✓ Simple and convenient functions
- ✓ Better communication quality compared to competitors (WhatsApp, Viber)

QFight

The registration stage and all legal procedures are being completed

QFight is a fighting promotion launched by the Qchain CEO (Andrey Zaitsev) and the President of Mixed Martial Arts in Moscow (Arthur Vardanyan).

All the fans of martial arts, especially MMA, will be able to enjoy entertaining fights of top fighters from all over the world.

QFIGHT

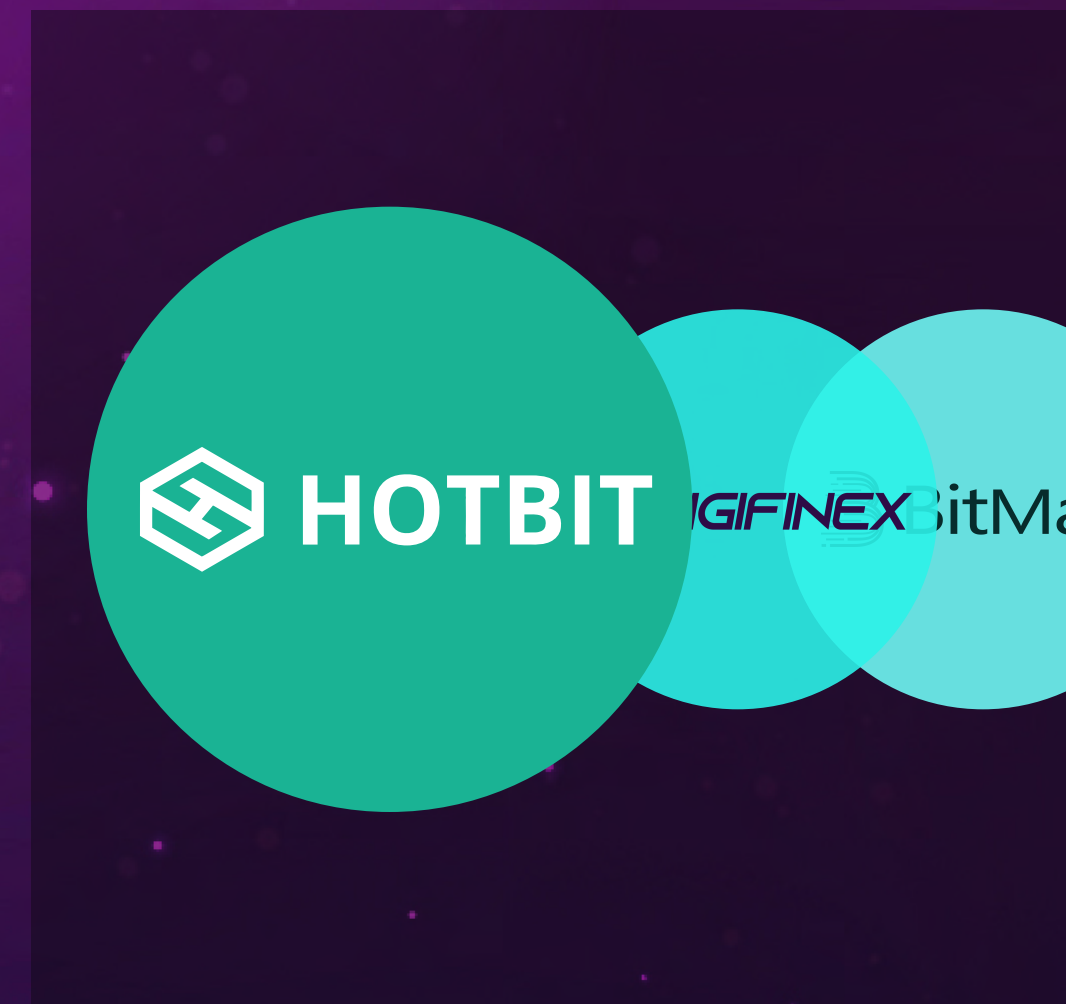

QChain: upcoming announcements

Full-scale launch of the QDEX decentralized exchange

Launch of the decentralized stablecoin

QDT listings

TRON blockchain integration into the Qchain node

Welcome to the future
